Human CD3D/CD3 delta Protein

CDD-HM101 Cat. No.

Description	
Source	Recombinant Human CD3D/CD3 delta Protein is expressed from HEK293 with His tag at the C-Terminus.
	It contains Phe22-Ala105.
Accession	P04234-1
Molecular Weight	The protein has a predicted MW of 10.4 kDa. Due to glycosylation, the protein migrates to 15 kDa based on Bis- Tris PAGE result.
Endotoxin	Less than 1 EU per μg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE
	> 95% as determined by HPLC
Formulation and	1 Storage

ormulation and Storage

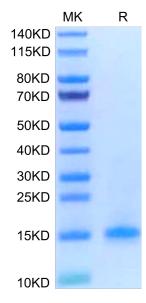

Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt80°C for 3 months after reconstitution.Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

T-cell surface glycoprotein CD3 delta chain, also known as CD3D, is a single-pass type I membrane protein.In immunology, the CD3 (cluster of differentiation 3) T cell co-receptor helps to activate both the cytotoxic T cell (CD8 naive T cells) and also T helper cells (CD4 naive T cells). It consists of a protein complex and is composed of four distinct chains. In mammals, the complex contains a CD3γ chain, a CD3δ chain, and two CD3ε chains.

Assay Data

Bis-Tris PAGE

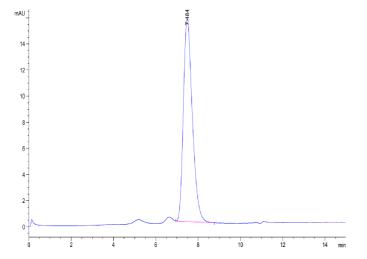

Human CD3 delta on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Cat. No. CDD-HM101

Assay Data

The purity of Human CD3 delta is greater than 95% as determined by SEC-HPLC.
